I am looking to obtain a challenging job working as full-stack web developer. Studying Mechanical Engineering and Web Development allows me to bring a unique set of problem-solving skills to the work environment.

WORK EXPERIENCE

JANUARY 2016 – JANUARY 2019
OPERATIONS MANAGER, THE SOURCERY GAME STORE

My responsibilities included day to day operations, employee productivity, and ordering. Also assisted in managing the stores social media pages.

SUMMER 2013 – SUMMER 2015
SALES ASSOCIATE, COSTPLUS WORLD MARKET

As a sales associate I unloaded truck shipments, assisted customers, and was a cashier.

EDUCATION

CERTIFICATE OF COMPLETION, GEORIGA TECH - CODING BOOTCAMP

During this program I learned market-driven skills needed to become a full-stack web developer. I learned front-end and back-end technologies to build complex projects with teams to simulate professional working environments. I finished the course with a 4.0 GPA.

MECHANICAL ENGINEERING, VIRGINIA COMMONWEALTH UNIVERSITY

Relevant completed course work includes Calculus, Differential Equations, and Visualization & Computation. I currently have 75 earned credit hours.

SKILLS

- Java
- HTML & CSS
- Javascript
- JQuery & D3
- Bootstrap & Materialize

- MySQL & MongoDB
- InfluxDB &Firebase
- Node.js
- Express
- React

PROJECTS

During the GA Tech Coding Bootcamp I completed numerous projects covering all the skills I have listed. My portfolio page has many of those projects listed. If you are looking for more information about the programing work that I have done, click the link to my portfolio above.
